PROFILE

IT technician and software developer with hands-on experience supporting users and systems across Microsoft 365, Google Workspace and Active Directory, on-site and remotely. Currently the primary technical contact for a school's administration systems, managing vendor integrations and building Power BI reporting. Background in full-stack development (Python, Java, JavaScript, SQL) from WeThinkCode_ and over a year tutoring full-stack web development, with a methodical approach to troubleshooting and clear communication with non-technical users.

SKILLS

IT & Systems: Microsoft 365, Google Workspace, Active Directory, Microsoft Azure, Ed-Admin, user and access management, networking, printers, end-user devices, AV equipment, remote support tools

Data & Reporting: Power BI dashboards and reports, SQL, MySQL, PostgreSQL, SQLite, data management

Development: Python, Java, JavaScript, C#, Node.js, Express.js, React.js, HTML, CSS, HTML5 Canvas, Dart/Flutter, REST APIs, CRUD, Git/GitHub

Ways of working: SDLC, Agile teams, technical documentation, vendor liaison, AI-assisted research and documentation

EXPERIENCE

Baseline IT · Cape Town

Site Based Technician · Constantia Waldorf School — Aug 2026 – Present

- Provide on-site support for staff and students, resolving hardware, software, network and connectivity issues.
- Administer Microsoft 365 and Google Workspace: user accounts, access control, email troubleshooting and security configuration.
- Serve as the primary technical contact for Ed-Admin, the school's administration system, and act as liaison between vendors and the school for third-party integrations, from implementation through ongoing support.
- Work with software providers to troubleshoot, test and maintain integrations between educational and business platforms.
- Design and build Power BI dashboards and reports that give administration data-driven insight for operational decisions.
- Support data management, reporting and process improvement across multiple school systems.
- Maintain network infrastructure, printers, end-user devices and audiovisual equipment, plus technical documentation and support procedures.

Remote Support Technician — Mar 2025 – Aug 2026

- Diagnosed and resolved a wide range of hardware, software and connectivity issues for users remotely.
- Managed user accounts, access control and general support across Microsoft 365, Google Workspace and Active Directory.
- Documented solutions and kept accurate support records for efficient issue tracking and resolution.
- Identified root causes, escalated complex problems to senior staff when needed and gave users clear preventative guidance, maintaining high customer satisfaction.

Learning Specialist · 2U, Inc. (remote) Jul 2023 – Oct 2024

- Tutored boot camp students in full-stack web development (Node.js, React.js, SQL, MongoDB) across homework, class exercises and projects.
- Broke down complex problems with clear explanations, building students' technical skills and confidence.
- Graded assignments within a 24–48 hour turnaround.

Junior Software Developer · Home Assist Technologies Jun 2022 – Oct 2022

- Worked with cross-functional teams to identify and prioritise new web application features, contributing to a 20% increase in user engagement.
- Developed and implemented software testing strategies that substantially reduced post-release bugs.

PROJECTS

Elderly Care · health app for older people Flutter · Dart · Android · iOS · Web

One calm app for medicines, appointments, health tracking and emergency help: one-tap SOS, medicine reminders with read-aloud, a blood pressure tracker, medical ID, nearby hospitals and a PIN or fingerprint lock. Started as my solo WeThinkCode_ final project, then rebuilt and redesigned for Android, iOS and the web with AES-256 encrypted data, accessible design, a step-by-step personal setup, four languages (English, Afrikaans, isiZulu, isiXhosa) and 95 automated tests. Prepared for release on the App Store and Google Play. Live demo at muneermiller.github.io/WeThinkCode-Projects/demo.html.

Stick Hero · browser arcade game JavaScript · HTML5 Canvas

One-button game built from scratch with no dependencies: a 60 fps time-based game loop, a state machine for each phase of play, procedurally generated levels with parallax scenery, and pointer events for mouse, touch and pen. Play it at muneermiller.github.io/StickHeroGame.

Multiplayer text-based robot world · WeThinkCode_ team project Java

Built with a team of five: players connect to each other's randomly generated worlds of obstacles, mines and pits, choose a class and play through a command interface.

Web projects · IBM SkillsBuild and personal HTML · CSS · JavaScript

Task manager web app (IBM final project), a social media dashboard with automatic light and dark themes, and a sticky sliding navigation component. Source at github.com/MuneerMiller.

EDUCATION

National Certificate: IT Systems Development (NQF 5) · WeThinkCode_ Aug 2020 – Oct 2022

Peer-led software engineering programme in Agile teams. As rotating team lead, reorganised the team's production and project file structure, raising output by 20% and cutting data handling errors by 32%.

Web Development Fundamentals · IBM SkillsBuild May 2023

High School Diploma · Grassy Park High School Dec 2019
